

SLC (NATIONAL) ONLINE FORUM

What is the SLC Forum?

- a virtual Policy conference
- used for SLC Policy Development
- attendees can participate in Policy “workshops” under different topics
- the “workshops” never end because all can contribute at any time + learn what others are contributing
- can give you a “heads up” on any Policies under Forum discussion (so you can be kept apprised of those in which you have an interest)
- used for discussion & SRL feedback prior to voting on resolutions that will go to the LPC National Convention on behalf of (Senior) Liberals from across Canada

Why use the SLC Forum?

- useful tool for policy development as it enables broader engagement and input from SRLs/Sections
- is an early indication of where support lies for Section Policy Resolutions in development
- you can search content – by keyword(s) (e.g “senior abuse”)
- you can engage at your own convenience
- hundreds of **Policy Resource Links 2019/2020** are already available to anyone on the Forum for research and discussion

How to use the SLC Forum

- register at <http://slcal.ca/forums/> OR ask to be registered **
- comment in the **Policy Resource Links 2019/2020** Boards - open to all, so far covering: *Election Interference / Electoral Reform / Environment / Healthcare / Housing / Jobs / Seniors*
- ask for a new discussion “workshop” (Board) to be added to Policy Resource Links and start discussion there, or add a topic, e.g. to *Seniors*.
- ask your Section Policy Chair to add you to a **private** Section “workshop”, if and when your Section has them.

** Send registration requests to SLC Communications Chair, seniorliberalscontact@gmail.com . If you register yourself, there will be a short delay while the Forum verifies that you are a SRL.

Registration is needed to protect and maintain your individual privacy and security. The website is essentially behind a wall, and the login panel is the gate that you must get past – by logging in – to get inside.

This protects users from being intimidated by *trolls*, aggressive users who love to get on public websites and destroy productive community-based discussion.
